6:30am -7:30am EST***

***Massachusetts General Hospital  
O’Keeffe Auditorium  
(HYBRID, In-person & on Zoom)***

**Austin T. Fragomen, MD** is a Professor of Clinical Orthopedic Surgery at Weill Cornell Medical School and HSS, who has excelled as an educator. He is the Director of the LLCRS Fellowship Program which includes recruitment and year-long training of exceptional young surgeons interested in pursuing a career in the subspecialty of Limb Deformity. Surgeons from various regions in the United States and from around the globe come to New York to rotate with Dr. Fragomen for month-long visiting-professor observer-ships to broaden how they approach complex orthopedic challenges.

With over 140 publications, research has been central to ensuring the highest quality patient care including surgical decision making and has given Dr. Fragomen a voice nationally and worldwide. Authoring textbook chapters requires not only a profound knowledge of the field of Limb Deformity but also demands meticulous scouring of publications, new and old, relevant to the topic, providing further information and perspective to the author. Dr. Fragomen maintains a prospective database of all the surgeries he has performed for use in later analysis to find trends in patient care. This data then drives future decision making to optimize surgery and post operative protocols ensuring the best possible outcomes and patient satisfaction.

Dr. Fragomen is invited to speak regularly at orthopedic programs around the United States, Canada, and abroad to share his research and personal experiences for the advancement of successful outcomes in these other centers.

As the president of the national Limb Lengthening & Reconstruction Society (LLRS) from 2019-21, Dr. Fragomen launched several initiatives that have inspired current members, drawn in new members, and gained traction at the American Academy of Orthopedic Surgeons (AAOS) where he also served on the Board of Subspecialty Societies. Dr. Fragomen will celebrate his 20th year practicing at HSS.
