Foot & Ankle Sports Reconstruction

“Leadership Why not How”

Thursday, April 27, 2023
6:30am -7:30am EST

Massachusetts General Hospital
O’Keeffe Auditorium
(HYBRID, In-person & on Zoom)

Thursday, April 27, 2023
Massachusetts General Hospital
Department of Orthopaedic Surgery

Kevin D. Martin DO, FAAOS, FAANA is an orthopedic foot and ankle surgeon specializing in sports medicine and arthroscopic procedures. He is passionate about caring for patients and developing necessary procedures for lower extremity injuries that can be very disabling and painful. He strives to be a good listener first, understanding my patients' expectations and goals.

Over his 24-year career in the US Army, Dr Martin learned to be a leader while gaining empathy for our wounded warriors as they live with devastating injuries to their feet and ankles. Caring for these soldiers was an honor and it prepared him for his career at the Ohio State Wexner Medical Center.

As a prior farm kid, Dr Martin greatly appreciated the opportunity that allowed him to study medicine. To pay it forward, he is an active mentor for residents and medical students. He provides his residents and medical students opportunities to get involved in research and clinical activities. He has helped develop orthopedics surgical simulation training to improve patient safety that also provides residents a safe, protected environment to grow and develop. Mentorship is paramount - balancing our faith, family, friends, and a career can be difficult, but having a mentor makes it much easier.

As an associate professor at The Ohio State University, Dr Martin is on the cutting edge of medicine - publishing research, learning new techniques, and educating other surgeons as an associate master instructor of arthroscopy. His research is focused on improving his patients' outcomes. He has published several new surgical techniques and has worked to improve assistive devices (crutches) and the transition to a hands-free crutch. Dr Martin is also developing a dynamic foot and ankle research consortium to further enhance patient care.

In his free time, he enjoys continues serving in the Army Reserve, as well as four-wheeling, camping, and fishing with my family and friends.

Highlights

- American Orthopaedic Foot and Ankle (AOFAS), European Traveling fellowship award
- American Orthopaedic Foot and Ankle (AOFAS), American Traveling Fellowship award
- Bronze Star (Army) combat action award for serving in Afghanistan
- Order of Military Medical Merit (top 10% of all Army physicians)
- Two U.S. patents for developing new combat splinting materials (FastCast™ spray-on foam)
- Designated as a Distinguished Arthroscopic Leader (DAL) by the Arthroscopy Association of North America (AANA)

GRAND ROUNDS

O'Keefe Auditorium
(HYBRID, In-person & on Zoom)
6:30am -7:30am EST
